

Project T27

Parsa Kermani Pour, Arshia Sharifi, Bhawdeep Arora

① department (department_id, department_name)

FD: { department_id $\rightarrow$ department_name

② doctor (doctor_id, full_name, email, department_id)

FD: { doctor_id $\rightarrow$ full_name, email, department_id
email $\rightarrow$ full_name, department_id, doctor_id

③ pharmacist (pharmacist_id, full_name, email)

FD: { pharmacist_id $\rightarrow$ full_name, email
email $\rightarrow$ full_name, pharmacist_id

④ patient (patient_id, first_name, last_name, ohip_number, phone_number, patient_description, DOB)

FD: { patient_id $\rightarrow$ first_name, last_name, ohip_number, phone_number, patient_description, DOB
ohip_number $\rightarrow$ first_name, last_name, phone_number, patient_description, patient_id, DOB
phone_number $\rightarrow$ first_name, last_name, ohip_number, patient_description, patient_id, DOB

⑤ supplier (supplier_id, supplier_name, phone_number, email, delivery_duration_days, supplier_address)

FD: { supplier_id $\rightarrow$ supplier_name, phone_number, email, delivery_duration_days
phone_number $\rightarrow$ supplier_name, email, delivery_duration_days, supplier_id

⑥ medication (supplier_id, drug_name)

FD: no functional dependencies. Simply holds composite key of drug supplied by supplier

⑦ supplied_from (supplier_id, drug_name, stock, restock_alert)

FD: { supplier_id, drug_name $\rightarrow$ stock, restock_alert
stock $\rightarrow$ restock_alert (computed)

⑧ prescription (prescription_id, notes, date_created, date_dispensed, patient_id, doctor_id, pharmacist_id, supplier_id, drug_name)

FD: { prescription_id $\rightarrow$ notes, date_created, date_dispensed, patient_id, doctor_id, pharmacist_id, supplier_id, drug_name
